

# Are you looking for a premium cast film, easy to print and install?

**THE190EVO**, NEW GENERATION CAST FILM ENGINEERED BY HEXIS IS MADE FOR YOU!

**Our film is conformable, versatile, and has an excellent gloss finish.** These qualities make it suitable for use in any circumstances and applications, such as vehicle fleet branding, boat wrap, 2-wheelers or interior decoration.

**THE190EVO** may be used in combination with our high performance cast laminates PC190G [gloss] and PC190M3 [matt].

**SOLV** **ECO-S** **UV** **LATEX**

**TAKE  
HEAT  
EASY** 

## Why is THE190EVO so unique?

**TAKE HEAT EASY®** (THE) is a new structured liner developed by HEXIS. The emboss has been designed in order to lower the initial tack and make the film **easy to install** even by **beginners**.

A new solvent-based adhesive has been developed as well to combine with the **TAKE HEAT EASY® liner and create this specific tack** you will get addicted to!

Last but not least, our printable film has also evolved. While remaining 50 micron thick, our chemists have integrated a special layer to provide a maximum opacity.

## Choose the right laminate

- The matching laminate for usual combination is the **PC190 series** (available in gloss and matt).
- For longer durability and high UV resistance, we recommend **PC500**, a PVC-free protection (also available in gloss and matt)
- For special effects, interior decoration projects, unique finishes : **PCCARBON** (carbon fibre), **PCWOOD** (wood effect), **PCSTAR** (glitter), **PCWALL** (mineral)

## Product specifications
